

SportsArt equip Breamish Valley holiday complex gym

Nestling at the foot of the Cheviot Hills in the tiny farming hamlet of Branton, is the luxury holiday complex of self catering Breamish Valley Cottages and extensive leisure facilities, including a new gym that has been fully fitted out by SportsArt Fitness (UK).

To meet the growing demand from the number of increasing visitors, the complex has seen controlled growth, with the introduction of superb new cottages and the addition of first class leisure facilities that includes a fully-heated 40ft. long indoor swimming pool

hot tub, sauna or steam room, plus sunshower to top up the tan.

No compromise on quality

Peter Moralee reported, "Experience shows that adding leisure facilities and quality fitness equipment to a premier accommodation complex can add a winning dimension to attract visitors. However, we did need reassurance that any fitness equipment that we purchased was user friendly, robust in construction, reliable and provided trouble free operation. After reviewing what equipment and suppliers were available, we committed to SportsArt Fitness equipment. Apart from submitting a competitive tender, N.E. Sales Manager Eric Tait was very enthusiastic and constructive in offering professional advice on our plans and equipment selection.

The facility now boasts a state of the art fitness suite with a range of health and fitness facilities to support and encourage visitors to participate in leisure pursuits.

SportsArt Fitness (UK) supplied several pieces of cardio equipment including treadmills, elliptical, X-trainer and steppers; plus adjustable bench and several strength training units including shoulder press, Pec Deck, leg press, cable tower, rotary torso toner, etc.

What also clinched the contract for SportsArt, was the comprehensive warranty and service deal which was included as an integral part of the tender and in our opinion, this is paramount in ensuring that the fitness equipment operates reliably and safely at all times.

The project was completed on time, within budget and has generated favourable response from our visitors staying over at Breamish Valley Cottages. Since installation of the equipment, we have only needed to contact SportsArt Service Department once and they came to our assistance immediately. On that basis, I can only report our dealings with SportsArt Fitness UK to have been excellent
